

RxLogic Rebate Administration Services: Smart, Insight-Driven Tools for Maximum Rebate Value

RxLogic is a leading technology company for pharmacy benefit claims processing that provides a SaaS-based platform of smart adjudication solutions. As the backbone of pharmacy claims processing, RxLogic empowers its stakeholder clients across the pharmacy benefit ecosystem to drive efficiency in pharmacy benefit and rebate administration, including:

- **PBMs**
- **Health plans and TPAs**
- **Self-insured employers**
- **Hospice and LTC organizations**
- **Government Organizations**
- **Commercial, Workers' Comp and Medical plans**
- **Pet and Veterinary benefit program**

A privately held, agile organization, RxLogic provides adaptable, data-driven solutions that enhance operational performance, improve patient outcomes and reduce costs. With a SaaS-based, user-focused interface and an API-first architecture, RxLogic equips healthcare organizations with powerful tools to better serve millions of individuals nationwide.

Delivering Value Through Transparent, Customized Rebate Optimization

RxLogic brings clarity and control to one of the most complex areas of pharmacy benefit management: rebates. Our technology platform offers real-time, claim-level information and end-to-end visibility into the rebate lifecycle. RxLogic empowers its clients to reduce net drug costs, improve formulary strategy and ensure that rebate dollars reach their intended destination.

Stepping Up Where Conventional Rebate Administrators Fall Short

Rebate Aggregators often obfuscate data and information, making it more difficult to underwrite, forecast and plan for the future -- as well as to secure the present. With forced formularies and plan designs, limited data and slow payment terms, the legacy services of rebate aggregators are outdated and can lead to PBM practices that are financially and mathematically creative versus transparent.

This is precisely where RxLogic provides a superior, more flexible solution. Powered with access to NDC-level data and real-time information, our team enables informed, formulary-based rebate decisions that allow our clients to deliver exceptional and transparent services.

What Sets RxLogic Apart

Pass-Through Rebate Data: RxLogic oversees the rebate process. Any data including submissions, receipt, rejection, payment etc. is tracked, stamped and logged, reducing administrative workload and ensuring the entire rebate journey from submission to payment is as transparent as possible.

Multi-Vendor Integration: RxLogic maintains partnerships with leading rebate vendors while remaining vendor-agnostic, allowing clients to align partners to their specific needs.

Comprehensive Audit-Ready Reporting: Enables plan sponsors to meet fiduciary responsibilities by verifying that the claims adjudicate accurately, according to the plan's summary plan description (SPD) and contractual agreements.

Flexible Financial Models: RxLogic continues to build smart financial solutions such as flexible models that include passthrough arrangements, minimum guarantees and underwriting tools. Each approach is designed to evolve with client needs and align with their financial strategy and risk tolerance.

Future-Forward Rebate Functionality

RxLogic's rebate services are being further integrated to deliver a more seamless and connected experience. These future enhancements will deliver a cohesive experience across key modules:

Claims adjudication engine with real-time processing for accurate, efficient transactions.

Formulary and benefit plan management to support rebate-driven design and pricing strategies.

Financial tools for streamlined invoicing, receivables and payment workflows including an end-to-end payment reconciliation system, reducing errors and improving financial accuracy.

Advanced reporting and analytics to track performance and support data-driven decisions.

Smart network marketplace enabling connectivity for discount card vendors, copay programs and other partners.

"RxLogic brings clarity and control to one of the most complex areas of pharmacy benefit management: rebates."

Your Rebates. Your Rules. Your Results.

Traditional rebate administration services often lack transparency, prioritize profit over patients and increase net costs. RxLogic offers unmatched visibility, performance and flexibility through technology that works for you, not around you.
