

RxLogic Formulary & Benefits (F&B) Connect Surescripts-Certified Formulary and Benefit Intelligence Embedded in RxLogic

RxLogic delivers modern SaaS solutions that power pharmacy benefit operations and real-time claims adjudication. Formulary & Benefits (F&B) Connect is a Surescripts-certified capability integrated directly into the RxLogic adjudication platform, enabling Prescribers, PBMs, TPAs, and health plans to apply authoritative formulary and benefit requirements consistently and in real-time.

By embedding management of Surescripts Formulary & Benefits data within the adjudication platform, RxLogic ensures that coverage indicators and utilization management requirements are evaluated accurately, reducing downstream friction and operational rework.

Delivering Value Through Real-Time Benefit Intelligence

Pharmacy claims adjudication depends on accurate, current benefit rules. When formulary status or utilization management requirements are misaligned, plans experience avoidable rejections, pharmacy callbacks, and manual intervention.

F&B Connect closes this gap by integrating Surescripts-certified Formulary & Benefits signals, utilizing the EDI 270 & 271 Transaction Standards directly into RxLogic's platform, ensuring that prescription information is evaluated against the most current formulary status, tier placement, and utilization management indicators such as prior authorization and step therapy.

This tight integration enables more consistent adjudication outcomes and supports smoother downstream pharmacy and member experiences.

Where Legacy Models Fall Short

Traditional adjudication environments often rely on:

- Static or delayed formulary updates
- Manual reconciliation between formulary systems and adjudication rules
- Limited real-time visibility into utilization management indicators
- Disconnected workflows that increase exception handling

These gaps introduce unnecessary complexity, slow resolution times, and increase administrative burden across pharmacy operations.

RxLogic F&B Connect addresses these challenges by embedding real-time benefit intelligence directly into adjudication logic.

What Sets RxLogic F&B Connect Apart

Surescripts-Certified Data Integration: RxLogic is certified by Surescripts to deliver Formulary & Benefits data in accordance with technical and operational standards.

Adjudication-Native Architecture: F&B Connect is not a standalone feed or external lookup. It is integrated into RxLogic's adjudication platform, enabling real-time evaluation of formulary status and benefit requirements.

Real-Time Coverage Indicators: Supports real-time 270 & 271 Transaction messaging for current formulary status, tier placement, and utilization management flags such as prior authorization and step therapy.

Rules-Aligned Benefit Execution: Ensures benefit configuration and adjudication rules are aligned with authoritative formulary data, reducing mismatches and manual overrides.

Modern, Cloud-Native Platform: Secure, scalable infrastructure designed to support high-volume adjudication environments for PBMs, TPAs, and health plans.

Value Across the Pharmacy Benefit Ecosystem

PBMs and TPAs

- Fewer avoidable claim rejections and pharmacy callbacks
- Reduced manual intervention and exception handling
- More consistent adjudication outcomes

Health Plans

- Stronger alignment between benefit design and execution
- Improved operational efficiency
- Better member experience driven by fewer delays

Employers and Plan Sponsors

- Reduced prescription disruption
- Improved affordability through consistent formulary enforcement

Future-Ready Clinical and Benefit Intelligence

RxLogic continues to invest in expanding intelligence within platform. Planned enhancements include:

- **Surescripts Medication History** is a separate Surescripts capability and will be added to RXL F&B Connect in future along with **Surescripts Real-Time Prescription Benefit (RTPB)** which includes patient specific cost, pricing and financial transparency

These enhancements further strengthen RxLogic's role as the intelligent backbone of pharmacy benefit execution.

Smarter Benefits. Better Outcomes.

RxLogic Formulary & Benefits (F&B) Connect enables management of Surescripts-certified benefit intelligence directly into the adjudication platform, enabling EHRs, and ePrescribing systems, PBMs and TPAs to execute benefit rules accurately, reduce friction, and improve pharmacy and member experiences at scale.
